FRANCO TOSI MECCANICA BACK TO TURKEY IN AKSA YALOVA

Turkish world leader of acrylic fiber AKSA Akrilik Kimya Sanayii A.Ş. has chosen Franco Tosi Meccanica for its new 35 MWel steam turbogenerator.

The new unit will produce electricity mainly used in the Yalova plant, and will be able to supply process steam at 2 different pressure levels.

Reliable design and operational flexibility were key factors in unit selection. Franco Tosi will handle an extended scope of supply, including main and process steam piping, as well as medium voltage electrical connections.

AKSA has been operating from 1976 two Franco Tosi units of 10 MWel, which still in excellent conditions today. We thank our Customer for the renewed trust, which strengthens our presence in Turkey lasting from first installation back in the seventies.

Do not hesitate to contact Franco Tosi sales office at marketing@francotosimeccanica.it for further details on this project and for further information on our ability to design customized turbomachines for industrial applications.

The negotiation team, left to right: Kutluhan Karasu (AKSA Procurement Team Leader), Marino Dotto (FTM Sales Director), Okan Kaya (AKSA Project Manager), Alberto Allegri (FTM Sales Manager), Alper Özkan (Procurement Manager), Asim Kara (AKSA Purchasing Specialist), Mauro Bianchi (BP Sales Director)
