ENTER-ENGINEERING and FRANCO TOSI sign contract for no. 2 Steam Turbine Generators for UZBEKISTAN

Uzbekistan based EPC Enter Engineering has awarded Franco Tosi Meccanica with an order for the engineering and construction of no. 2 Steam Turbine Generator for the "Mustakillikning 25 yilligi" (25 years of independence) gas project in Uzbekistan.

Founded in 2012, Enter Engineering Pte. Ltd. is one of the most dynamic companies in Central Asia and Russia's oil & gas and industrial construction market, as well as one of the largest EPC contractors in the Uzbek market, implementing major construction and modernization projects in the oil and gas, chemical, energy and civil engineering industries.

The no. 2 full-API back-pressure steam turboset are designed to utilize approx. 220 tons of steam per hour and produce 24MW of electrical power output each.

Feel free to contact Franco Tosi Sales Department at marketing@francotosimeccanica.it for additional details over this Project, and for more information on our capabilities to design specific tailor-made Turbomachines for your needs also in the Oil & Gas market.
