MAN ENERGY SOLUTIONS and FRANCO TOSI MECCANICA reinforce their collaboration with contract for 4 steam turbines for 1.25 Mega TPY PTA (MPTA) compressor trains

MAN Energy Solutions, the worldwide market leader in the development and construction of machinery trains for purified terephthalic acid (PTA) industry, and Franco Tosi Meccanica, a veteran manufacturer of large Turbomachines for Power Generation, has signed an agreement for the joint design and construction of 4 Steam Turbines for MEGA PTA production plant.

The agreement is to cover additional business in the future and comprises sharing of proprietary technologies and intelligent exploit of fabrication, machining and assembly capabilities at the existing manufacturing sites.

The first four turbines are currently in advanced stage of construction with deliveries and installations scheduled for Q1 2022.

Feel free to contact Franco Tosi Sales Department at marketing@francotosimeccanica.it for additional details over this Project, and for more information on our capabilities to design specific tailor-made Turbomachines for your needs.
